Introducing Progora

The New Marketplace Technology that Streamlines Public Sector Procurement

Progora is the new, cloud-based marketplace technology that makes it easy to achieve more with less

In a climate where the public sector is under pressure to cut expenditure and increase service levels, you can't afford to waste budget during procurement.

Progora brings buyers and suppliers together in an innovative digital environment, facilitating smart purchasing by giving you a centralised marketplace configured to your requirements and frameworks.

Used by organisations like Crown Commercial Service, IBM and Lenovo, this cost-effective technology integrates seamlessly with your existing systems and is simple for staff and suppliers to use.

Crown Commercial Service describes Progora as delivering "easier, fairer, better buying for all"

Progora's flexibility and transparency enable you and your suppliers to work together easily and openly. And the many benefits are realised quickly for swift ROI and low total cost of ownership.

Real-time Price & Stock Checks

Algorithms automatically calculate the most economical way to purchase.

Centralised Purchasing Platform

Aggregation and automation enable you to save money and reduce rogue procurement.

Fast Deployment

In just 12 weeks, you have a robust platform that simplifies purchasing and delivers cost savings.

Enhanced Buyer-Supplier Collaboration

You foster strong working relationships across your supplier community, from SMEs to large businesses.

Flexibility & Scalability

Easily add new categories, frameworks and functionality, like guided advisors and purchase-to-pay workflows.
